

IBM COGNOS ANALYTICS

DASHBOARDS, SELF-SERVICE ANALYTICS AND PIXEL-PERFECT REPORTS

Are you able to create, update and distribute your reports easily? Do you have the ability to create dashboards with impressive, rich visualisations? Are you confident there are no important business insights hidden in your data?

IBM Cognos Analytics software gives decision makers a fresh business perspective, turning data into rich information that can be used to access the past, present and future views of your business and its performance in order to capitalise on opportunities and minimise risks. These game-changing insights enable businesses to respond efficiently to rapidly evolving business needs.
