

IBM COGNOS CONTROLLER

COMPLETE, ACCURATE AND AUDITABLE FINANCIAL CONSOLIDATION

Do you rely on a complex web of spreadsheets to manage financial planning and reporting? Are you using a separate system for financial consolidations? Do your analysts spend more time manipulating data than analysing it?

IBM Cognos Controller helps to achieve a multi-dimensional approach to financial planning and forecasting. It automates manual processes so that the risk of errors from relying on spreadsheets is eliminated and the finance team can deliver insight to the business faster and more reliably than ever before.
